New Objective: The Undead Lord is possessed and a danger to the living. Best to put him to rest for good. First you must find how to do it.

You do not have a key to open the locked metal gate for the mortuary, so frob the hidden button behind the crate in the upper level NE corner to move the bookcase (on a timer) near the chest to access the mortuary via a crawlspace.

Down in the first mortuary room collect [Lucas' key](#) from the floor near the zombie, read the book on the desk and then use the crate in the NE corner to get back up onto the higher metal walkway and remove / destroy the crates in the SW corner to find a crawl space to access the second mortuary room.

In this second room The Undead Lord is wandering around. You need to collect the [storage room key](#) from inside the tomb and the [mortuary key](#) from a small shelf to the right of the door below where you dropped down from.

Use the mortuary key to open the door, (call the key up in your inventory and use item key, default I). Back in the previous room enter the storage room and read the note on the table.

New Note: *You know how to destroy the Undead Lord. Now you must sprinkle the Enchanted scroll with bile.*

Collect the *flask of bile* off the table.

Go back into the other room where the Undead Lord is and use (default I) the flask of bile on the scroll on the pedestal (the scroll with hieroglyphics) to destroy the Undead Lord.

Objective Complete: *The Undead Lord is possessed and a danger to the living. Best to put him to rest for good. First you must find how to do it.*

Use Reuben's key on the grill in the NW corner to find Reuben's secret hide away and collect the battle horn.

Objective Complete: *Find and collect Reuben's valuable Artifact.*

Head up the stairs to get back to the upper level, use Lucas' key to open the chest next to the bookcase to collect the last of the loot before heading back out to the cemetery (button to open doors to the left of the wooden doors) where you will finish the mission.
